## Clarifier Equipment Application Data Sheet

Today's Date:							
Reference From:							
Company:							
Address:							
Name:							
Department:							
Phone:							
Email:							
Funded Project:							
Target Completion Date:							
Representative or Salesman:							
Equipment Location:							
Budget or Firm Price:							
Process Liquid:							
Description of Application:							
Temperature of Process Liquid:							
Specific Gravity of Process Liquid:							
Average Flow Rate:		Gallons per minute					
Maximum Flow Rate:		Gallons per minute					
Materials to be Separated:							
1.		Specific Gravity:					
2.		Specific Gravity:					
Quantities:		por Hour	per Day				
Chemical Treatment Required:		Pre-Tratamiento	Post-Tratamiento				
Describe:							
Settling Rate Information:							
Required Effective Plate Area:			sq. ft.				
Floatable Contaminant Removal:							
Belt Skimmer	Top Conveyor	Overflow Weir	Slotted Pipe				
Settleable Contaminated Removal:							
Drag Conveyor	Bottom Purge	Thickener / Rake					
Clarifier Bottom Construction:		Flat	Pyramid / Cone				
Construction:		Mild Steel	Stainless Steel	FRP	Other:		
Plates:		Mild Steel	Stainless Steel	FRP	PVC	Polypropylene	Other:
Installed:		Indoor	Outdoor				
Freeze Protection:		No	Yes -Tipo:				
MEC Clarifier Type:		Compact	Circular	Vertical	API Separator		
Comments, Special Features:							
Electrical Requirements: (230/460, component mfg, PLC Specifications) :
